

# INFRARED INTERACTIVE WHITEBOARD

## Multi-Touch Detection

Multi-Touch Board is the latest interactive whiteboard system that enhances interactive teaching and collaborative learning. This truly multi-touch whiteboard system is user-friendly and without additional setting on multi-user mode.

Multi-Touch Board system enables up to ten users to work together on the interactive whiteboard. Users can write, draw and interact with content on the interactive whiteboard simultaneously. This creates even better and more interactive teaching & learning environment.

## 10 / 6 / 4 / 2 Users Writing & Drawing in Different Colors

With the feature up to ten / six / four / dual users can individually write and draw with different colors at the same time. This enhances individual creativity and also encourages group collaborative learning.

## Writing & Erasing Simultaneously

This feature allows user to write & erase at the same time. This enables presentation and collaboration to run smoothly and efficiently.

## Support 3rd Parties Teaching Software

The Multi -Touch Board system is compatible with other teaching & learning software (e.g. RM Easiteach Software) which enables users to create a more interactive environment.
